DETAILED ACTION

Applicant's amendment and arguments filed on 16 January 2007 have been fully considered. Claims 1-31 are therefore allowed with the arguments and/or additional limitations included.

Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest a flexible optical circuit as a whole, but more specifically fails to teach a heating element as part of the flexible circuit for maintaining a constant temperature within the flexible circuit in combination with all of the other limitations as claimed. Furthermore, the prior art fails to disclose or reasonably suggest the heating element/circuit to be flexible.

A close prior art of record is EP 0 913 268 to Kohama et al. Kohama et al teaches a flexible substrate including woven fibers self-pressured onto the flexible substrate. Kohama et al further teaches heat-meltable sheets heated/melted onto the flexible substrate to create a single flexible circuit. But Kohama et al fails to teach the woven fibers to be optical fibers. Furthermore, Kohama et al fails to teach a heating element for maintaining a constant temperature. Additionally, there is no suggestion by Kohama et al for the heat-meltable sheet to be flexible. And lastly, once the heat-meltable sheet is melted onto the flexible substrate, it has laminated the substrate therefore preventing flexibility and bending.

Therefore, claims 1-31 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. None of the documents cited by the Examiner discloses or reasonably suggests the allowable subject matter discussed above.
